CANDLE BURNING INSTRUCTIONS

1. Your first Burn time on your candle is important. Burn the candle until the wax pool reaches edge-to-edge, approximately 3 – 7 hours, then extinguish without the wax flowing over the center of the candle. If the candle is 3” then EVERY TIME you burn it, burn it 3 – 6 hours. This avoids “tunneling.”
2. To prevent smoking, KEEP YOUR WICK TRIMMED to ¼ of an inch at all times, never let the flame get higher than ½”. Monitor your flame/wick while the candle is burning.
3. Keep the wick straight and centered. This will ensure a nice even burn throughout the lifetime of your candle. JAR CANDLES should be stopped when there is ½” wax left at the bottom. Freeze the jar and scoop out any remaining wax to melt in a wax melting lamp or pot.
4. Do not leave a burning candle unattended. Pillar, or freestanding candles, should be burned only until the wax pool reaches about 1/4” from the edge of the candle. Use the 1 – 2 hours per inch rule. At that point, put the candle out and let the wax harden, and start all over again.
5. If your wick “mushrooms” the wick was probably too long as it was burning. Just extinguish it, trim it to ¼” and relight it.
6. Rotate your candle every so often. Keep out of drafts.
7. Remove any external trimmings or decorations before burning your candle.
8. To extinguish your candle use a wick dipper. This is the smokeless way to put out a candle.
9. Keep candles out of reach of children and pets. Keep a freestanding pillar candle on a pan.
10. To prevent fading, keep your artisan hand made candle out of direct sunlight.

DELIVERY TIME

Since each candle is freshly hand made by the artist, your order will be shipped in about 3 weeks to me and some of them to your hostess . Your hostess will pack them and get them to you . Order plenty of the candles for yourself and for gifts!
